TROPICAL CYCLONE BULLETIN NO. 17
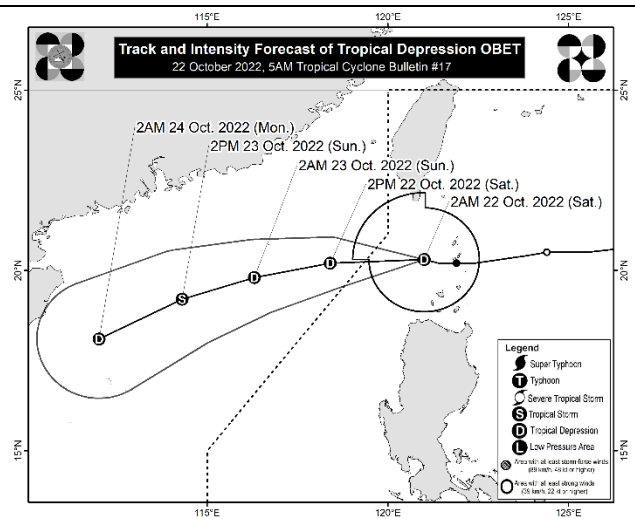

Tropical Depression OBET

Issued at 5:00 AM, 22 October 2022

Valid for broadcast until the next bulletin at 11:00 AM today

HAZARDS AFFECTING LAND AREAS
<p>Heavy Rainfall "OBET" is unlikely to bring heavy rainfall over any portion of the country.</p> <p>Severe Winds Areas where Wind Signal No. 1 is hoisted may still experience strong winds (strong breeze to near gale strength). It is also possible that wind signals will be lifted within the day.</p>
HAZARDS AFFECTING COASTAL WATERS
<p>Under the influence of the surge of the Northeast Monsoon and the tropical depression, a marine gale warning remains in effect over the seaboard of Northern Luzon. For more information, refer to Gale Warning #26 issued at 5:00 AM yesterday.</p>
TRACK AND INTENSITY OUTLOOK
<p>OBET is forecast to exit the Philippine Area of Responsibility (PAR) today. A period of slight intensification remains possible over the West Philippine Sea as the tropical depression continues to move away from the country.</p>

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
